DETAILED ACTION

This is a response to the Amendment received on November 21, 2003, in which claims 1-2, 4, 11-13, 29 and 33-37 were amended and claims 55-64 were added. Claims 1-45 and 49-64 are pending.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 38-39 and 49-54 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 42 and 44 of U.S. Patent No. 5,788,574 in view of Franchi (U.S. Patent No. 5,770,533). U.S. Patent No. 5,788,574 discloses a method of incorporating one of a consecutive side bets into a game a chance of claim 49, the betting unit of claim 38 and a chip receptacle of claim 39, but does not disclose having a weighing sensor to determine the weight of the chip placed thereon. However, Franchi discloses having means to weigh a chip in order to validate the chip at the gaming table. One would be motivated to provide weighing means to the Ornstein patent in order to further validate the chips or tokens used. Therefore, it would have been obvious to one having ordinary skill in the art at

the time the invention was made to incorporate weighing means into the gaming table of Ornstein in order to further validate the chips or tokens used.

Allowable Subject Matter

Claims 1-37, 40-45 and 55-64 are allowed.

While the prior art reference of record provides a gaming table having weighing means. However, the prior art fails to teach, disclose or suggest using the weighing means to determine the total monetary value of the different tokens placed on the weighing sensor, wherein there are a plurality of monetary denomination of chips and each denomination having a weight that is different from every other denomination, as claimed in Applicants' invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
